

VEGETAL-COVER

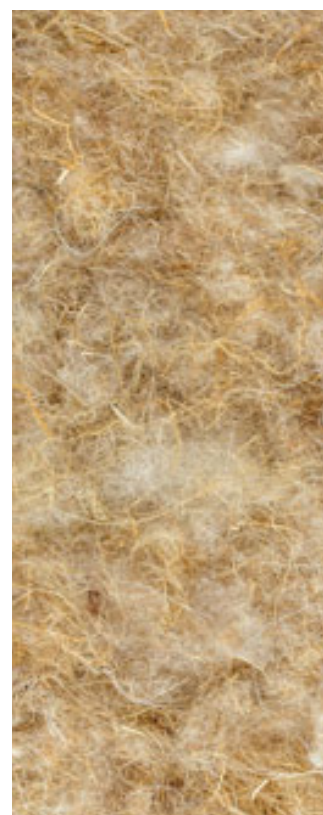

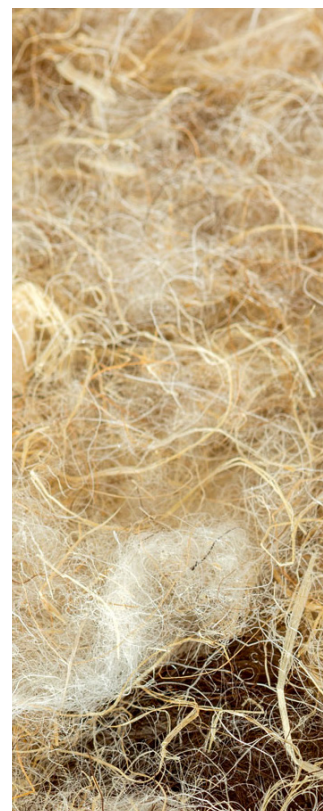

Vegetal Cover

Rolls for garden roofs.
Composed of wool fiber and hemp fiber, providing nutrients of animal and plant origin to plants.

GENERAL CHARACTERISTICS

- Improve roof insulation
- Protect it from the roots of plants
- Lighten the weight of the entire system and maintain the moisture needed for plant development.

TECHNICAL DATA

Characteristics VEGETAL COVER	
Composition	50% wool 50% hemp
Resistance coefficient to water vapour	$\tau = \mu$
Hygroscopic capacity	up to 30% weight
Fire resistance	F
Delivering format	1 Mantle package

SUPPLY FORMAT

Roll formats							
Code	Thickness (mm)	Density (kg/m ³)	Thermal resistance (m ² ·K)/W	Water absorption 45° (30min)	Water absorption 0° (10min)	Broad (m)	Length (m)
