

## Vegetal Cover

Mulches for garden coverings. They are composed of wool fibre and hemp fibre, providing plants with nutrients of animal and vegetable origin.

## MAIN CHARACTERISTICS

- Improve the insulation of the roof
- Protect it from plant roots
- Maintain the humidity necessary for the development of the plants.
- Lighten the weight of the whole system.

## TECHNICAL CHARACTERISTICS

Characteristics VEGETAL COVER	
Composition	50% sheep's wool 50% hemp
μ	1
Hygroscopic coefficient	Up to 30% of its weight
Fire reaction	F
Delivery format	Packs of 1 mantle

## DELIVERY FORMAT

Format of the mantles							
Code	Thick-ness (mm)	Density (kg/m <sup>3</sup> )	Thermal resistance (m <sup>2</sup> ·K)/W	Water absorp-tion at 45° (30min)	Water absorp-tion at 0° (10min)	Width (m)	Long (m)
VA-VC31102025	30	25	0,81	4,6 l/m <sup>2</sup>	11,7 l/m <sup>2</sup>	1,2	20
